Good afternoon,

It has come to our attention, through the completion of your SF86 security forms, that you have used illegal drugs (to include marijuana) and/or misused prescription drugs within the last 12 months. As a result of this, you are not eligible to continue processing for employment with the National Security Agency (NSA). You may consider re-applying for a position with the NSA when and if this 12-month period has been achieved. Before re-applying for NSA employment, please consider that 'The Office of Personnel Management' and the 'Director of National Intelligence' have affirmed that persons who engage in illegal drug use are not suitable for federal employment and are ineligible to hold a security clearance. We recognize that many states have legalized the sale of recreational marijuana and the use of medical marijuana. Despite this, the use of marijuana for any purpose remains a violation of federal law.

Your processing be will be discontinued due to illegal drug use in the last 12 months. If you have any questions or concerns regarding this update to your processing for employment, please contact me to discuss further.

Thanks,

Student Programs, NSA

Office of Recruitment
